About Me

As a self-taught web developer, I am passionate about creating dynamic and engaging user experiences. I wrote my first piece of code in the autumn of 2022 and have never looked back. I love to learn about new technologies and implement them to solve problems.

I graduated from Andrei Neagoie's 'The Complete Web Developer' in the spring of 2023. Since then I have worked on various personal and collaborative projects to enhance my skills as a developer, with a primary focus on JavaScript and React.

Personal Development

Projects | Web Developer 2023

- **Move It! Sports Coaching** – Created the company website for a sports coaching business, showcasing services, testimonials, and a booking system to attract and engage clients.
- **Smart Brain AI** – Implemented an advanced image recognition system utilising AI technology to accurately detect and identify faces in uploaded pictures.
- **Web3 Geography** – Collaborated on a dynamic website to monitor and analyse vacancy data within the cryptocurrency industry, providing valuable insights into job opportunities and trends.
- **Where's My Water?** – Currently developing a comprehensive resource platform specifically catering to campers and hikers, allowing users to contribute and verify fresh water sources, subsequently adding them to an interactive map for easy access and navigation.

Professional Experience

dnata UK Ltd. | Technical Author 2018 – 2022

Key responsibilities:

- Create and maintain corporate documentation, libraries and control procedures.
- Communicate with the global business and dnata HQ to ensure standardisation of procedures.
- Conduct safety, quality and compliance audits based on the above procedures.
- Prepare audit reports and communicate the insights of these reports to the broader business.
- Consult with the management team to develop long-term corrective action plans.
